

PRESS RELEASE

REN REVISES ITS INVESTMENT PLAN FOR 2009

REN is preparing a revision of its investment plan for the period 2009 - 2014, which covers both the sectors of electricity transmission as well as the sector of natural gas transportation, storage and regasification.

In this context, the company has already defined the estimated amount that will be invested during the financial year of 2009, which will be of about 500 million euros. This estimated amount represents an increase of about 200 million euros in relation to the amount invested in 2008, which was 313 million euros.
