EBITDA stood at €127.4M, a 2.6% (-€3.4M) YoY decrease. Despite the positive evolution of the average RAB (+4.6%, +€151.1M), RAB remuneration decreased by €4.7M (-6.7%) due to the decrease in the rate of return of electricity RAB (-176 basis point);

Net financial income decreased by 6.2% to €-34.2M essentially due to the change in the timing of the recognition of the dividends paid by REE and Enagás; the average cost of debt remained stable when compared to 2012;

Net Income amounted to €29.1M, a €5.4M decrease versus 1Q12, as a consequence of the decrease in EBITDA and in financial income (from -€32.2M in 1Q12 to -€34.2M in 1Q13);

CAPEX and transfers to RAB amounted to €20.3M and €2.4M respectively. The reduction with respect to the previous year reflects the ongoing deceleration of demand for new electricity and gas infrastructures;

REN became the Portuguese company with the best overall rating. In January Fitch started covering REN with an investment grade rating, and in March Standard and Poor’s revised REN’s outlook from negative to stable.

**TAXES (€M)**

- 1Q12: 16.0
- 1Q13: 14.1
- Change: -1.9€M (-11.9%)
Net Income dropped by -€5.4M

(€M)
The average cost of debt was 5.74% (5.70% in 2012);

Credit metrics: Net debt/EBITDA slightly improved (decreased to 4.85x from 4.88x), while FFO/Net debt stood at 10.3% (13.3% in 2012) and FFO interest coverage decreased to 2.88x versus 3.35x in 2012.

Operational cash flow = EBIT + Depreciation + Provisions - Non cash items
HCB = Hidroeléctrica Cahora Bassa
IN CONCLUSION

- REN’s operational results were much in line with expectations, displaying a decrease due to the sharp reduction in the Portuguese 5 year CDS;

- The year on year comparison of REN’s net income was negatively distorted by, among other factors, the anticipation to December 2012 of the REE and ENAGÁS’ dividends and the freeze during 1Q2012 of wage increases related to REN’s collective labor agreement. Furthermore, the reduction in Portuguese sovereign risk will mostly be felt towards the end of 2013;

- The natural gas regulatory review is underway and REN’s expectation is that the main change will be the replacement of the fixed rate of return with a variable rate. The final outcome will be known in mid June;

- The dividend related to fiscal year 2012 will be paid on May 27th and represents a dividend yield of 7.3%.
