9M18 HIGHLIGHTS

- In 9M18, EBITDA grew by 3.8% (€14.0M) yoy to €378.4M, while Net Profit rose by 2.3% (€2.0M) yoy to €90.9M;

- EBITDA increase was mainly driven by the consolidation of Portgás (€31.8M), the contribution from OPEX (€8.0M) and the sale of the LPG\(^{(1)}\) business (€4.0M). Portgás added €460.5M to the average RAB, which totalized €3,835.2M (€3,462.5M in 9M17). Nevertheless, revenues suffered from lower remuneration rates, due to the parameters set for the current electricity regulatory period and the decline in bond yields;

- REN’s solid Financial performance (2.3%, to €‐43.5M), with the average cost of debt displaying a reduction (2.3%, versus 2.6% in 9M17) contributed to Net Profit stability. Though, it was penalized by two main effects: (1) the increase in Amortizations (€13.4M), due to the integration of Portgás; and (2) the maintenance of the extraordinary energy sector levy (€25.4M in 2018 and €125M in 5 years), that brought the effective tax rate to 38.7%. Excluding extraordinary effects, Recurrent Net Profit amounted to €112.5M (-3.8%, -€4.4M);

- In 16th October 2018, Standard & Poor’s Global Ratings (S&P) upgraded REN’s corporate credit rating to BBB/A-2 from BBB-/A-3, with a stable outlook. Thus, REN strengthened further its position as the Portuguese company with the best rating from all three major agencies.

\(^{(1)}\)LPG: Liquefied Petroleum Gas.

- Net Profit 9M18: €90.9

€2.0M (2.3%)
Over the last nine months, REN’s EBITDA more than compensated the lower asset remuneration resulting from the less supportive 2018-2020 electricity transmission regulatory framework and the decrease in bond yields, with income coming from Portgás and the sale of its LPG business;

The integration of Portgás is going according to plan and should be finished in 2019. So far in 2018 Portgás already contributed to the Group’s EBITDA with €35.7M;

Despite the challenging energy sector environment, in which REN remained penalized by an extraordinary levy, the Company managed to strengthen its financial profile, achieving the lowest average cost of debt ever;

These effects led to a slightly higher Net Profit for the period (2.3% yoy);

In October, S&P has risen the company's rating status to "BBB/A-2". The rating action mainly mirrors S&P view of REN's conservative financial policy and improved competitive position through enhanced diversification following the recent acquisition of Portgás in Portugal and of a 42.5% stake in Chilean gas pipeline Electrogas. This new rating contributes to a more favourable climate among REN’s creditors and helps to open the door for future issues of debt securities at potentially lower costs.
