

CONCEPT OF DOUBLE MATERIALITY

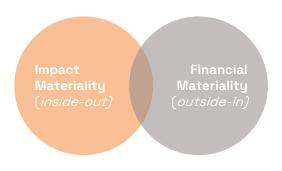

According to the requirements of the CSRD, ESRS standards and EFRAG's Materiality Guidance, a sustainability impact, risk or opportunity (IRO) is 'material' when it meets the criteria defined for impact materiality (positive or negative impacts) or for financial materiality (risks and opportunities) or both.

Impact materiality

The company can have an impact on the environment and society

Impacts: impact of the company on environmental and social issues. Assessed in terms of scale, scope, probability and irreversibility for negative impacts.

IROs with a rating above 3.5 were identified as material.

Financial materiality

The environment and society can have an impact on the company

Risks and opportunities: financial effects for the company arising from sustainability issues. Assessed in terms of <u>magnitude</u> and <u>probability</u>.

PROCESS

1. Identification and classification of relevant stakeholders

2. Preparation of a list of impacts and a list of risks and opportunities

3. Assessment of impacts, risks and opportunities

4. Stakeholder consultation

5. Final result

Identification of Impacts, Risks, and Opportunities

- Identification of stakeholders with the support of **REN internal representatives**
- Identification of the organisation's main impacts, risks and opportunities through benchmarking analysis and key trends
- Definition of applicable thresholds for impact materiality and financial materiality
- Prioritisation of topics considering the organisation's impact on the environment and society, taking into account consultation with stakeholders via online questionnaire and interviews
- Prioritisation of risks and opportunities considering their relevance to the business and their impact on the organisation's value creation potential, with the **support** of REN internal representatives

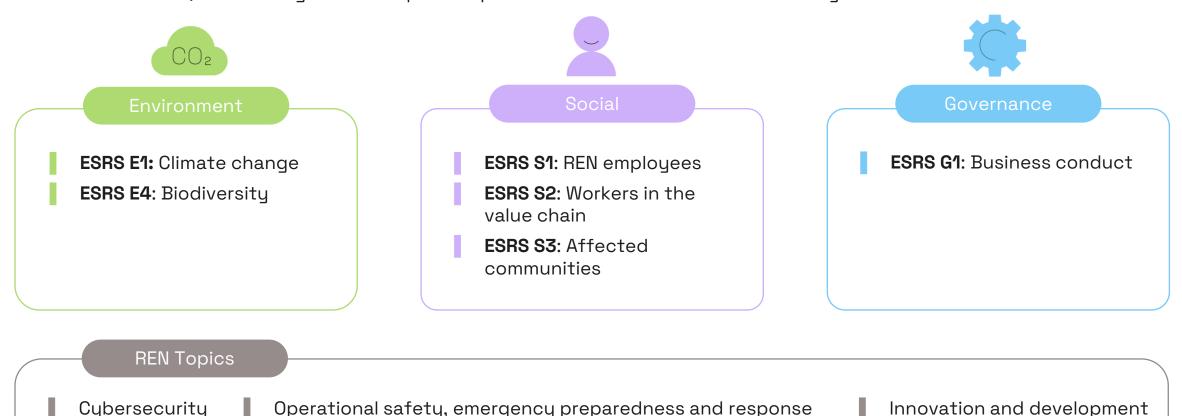

- Identification of IROs that are above the defined threshold
- Validation of the final list of IROs
- The results were approved by the Executive Committee

Work supported by an external entity

RESULTS

From the double materiality analysis, 37 impacts, risks and opportunities (IROs) were identified, divided into nine themes, in the environmental, social and governance pillars. Specific themes related to REN's activity were also identified:

I(+)

RESULTS

Results:

I (+) Positive impact I(-) Negative Impact O Opportunity B Risk

Environment

ESRS E1 Climate change

I(-) GHG emissions from REN's activities and its value chain
 I(-) Delays in project delivery
 O Development and/or expansion of low-carbon products and services
 O Use of green financing techniques (e.g. green bonds)
 R Slower-than-expected growth in connections to renewable energy sources

ESRS E4 Biodiversity

I(+) Protection, conservation, and restoration of land biodiversity

Contribution to a net-zero economy

I(-) Infrastructure and operations' impact on biodiversity and ecosystems

RESULTS

Results:

I (+) Positive impact I(-) Negative Impact O Opportunity R Risk

Social

ESRS S1 REN employees

- I(+) Remuneration above the minimum living wage
- I(+) Development of a safety culture
- I(+) Employee training and skills development
- I(-) Work accidents
- **O** Stability and quality of employment
- O REN's commitment to employees training
- **R** Talent attraction and retention

ESRS S2 Workers in the value chain

- I(+) Training and skills development for workers in the value chain
- I(-) Forced labour in the value chain
- I(-) Occupational health and safety in the value chain
- O Selection of suppliers with good labour and human rights practices
- **0** Implementation of human rights due diligence in the supply chain
- **R** Workplace accidents involving workers in the value chain
- **R** REN operations can be compromised by inadequate working conditions in the value chain
- **R** Forced labour in the value chain

ESRS S3 Affected communities

- I(+) Development of socially responsible partnerships with the community
- I(+) Local jobs and training opportunities
- R Balanced relationship with the local community

RESULTS

Governance

ESRS G1 Business conduct

- Protection of whistleblowers

 I (+) through anti-retaliation policies and procedures
- I(+) Timely payment to suppliers
- (+) Responsible management of the supply chain
 - O Whistleblowing
 - O Sustainable supply chain management
 - Non-compliance with the contract
 - R and/or the supplier's code of conduct

Results:

- I (+) Positive impact I(-) Negative Impact
- **O** Opportunity
- **R** Risk

REN Topics

Cubersecurity

Operational safety, emergency preparedness and response

Innovation and development

- (-) Cyber attacks on REN's infrastructure and systems
- R Occurrence of cyber attacks
- I(-) Interruptions in energy T&D
- R Interruptions in energy T&D
- I (+) Operational innovation

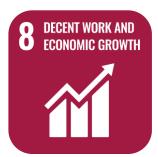

SUSTAINABLE DEVELOPMENT GOALS (SDGs)

Based on the impact of our activities, as well as the results of stakeholder consultations, we **reaffirm our commitment to the SDGs** identified as priority and relevant:

PRIORITY

RELEVANT
