FINAL REMARKS

- ▶ The first quarter of 2019 was uneventful in terms of results. EBITDA was slightly below that of the same period of 2018, given the decrease in asset remuneration;
- ▶ The slowdown in operational results was offset by lower financials and lower taxes;
- ▶ Financial Results benefited from a smaller stock of debt (Net Debt went down by €29.8M year-on-year) and a slightly lower cost of debt, it went down from 2.30% to 2.27%;
- ▶ Both Portgás and Electrogas contributed positively to results and are performing according to plan;
- ▶ All in all Net Profit stood flat in comparison to the same period of 2018;
- ▶ On April 1st ERSE made public some parameters for the 2020-2023 gas regulatory framework. They propose that for an average ten-year bond yield of 1.5% the rate of return shall be 5%. The new rules will be set for four years instead of the former three;
- ▶ This morning REN's General Shareholders Meeting approved the payment of a dividend of €0.171 per share that will be paid within the next 30 days.
